# Relentless

Working hard is in your DNA.  
Which is why every day, you go out there and dig.  
Pry. Strike. And demolish. Your work is rigorous.  
Relentless. And unforgiving.  
And at the end of the day, you hurt.  
We feel your pain.

Truth is, there are plenty of tools out there  
that “get the job done.” But how many of  
them can also say they work for you?  
We can.

We work tirelessly to design tools that not only  
perform and last, but reduce negative impact  
on your body. It’s called Advanced Human  
Engineering and it’s a process of study, design  
and validation that puts you at the center of it all.  
It’s ruthless. But at the end of the day,  
it solves problems. Real problems for real people.  
And that is the heart of our design DNA.

# PowerGear™

## Utilise more of your strength

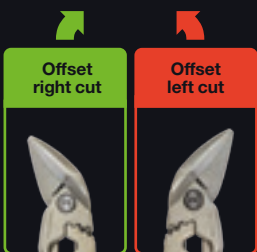

Patented PowerGear™ technology gives you over 40% more power, making it easier to cut sheet metal, especially at the beginning of the cut where more force is required

## Optimised handle span

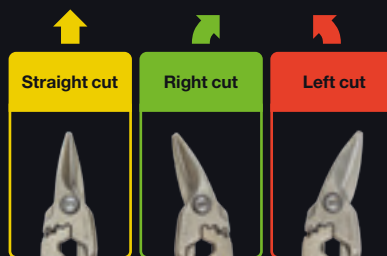

Fits your grip, letting you apply more power without sacrificing cut length

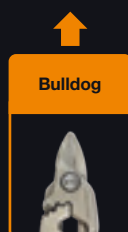

## A tool for every task

Offset aviation snips allow you to keep your hand on top of the sheet for cuts through the center of the sheet. These tools cut at a sharper angle, distancing your hands from sharp, jagged work surfaces.

Ideal for cutting a range of heavy-duty materials

Shorter cut length increases cutting capacity
